1. Preface

PDF export of the original HTML instructions

This PDF document is an automated export of an interactive set of HTML instructions. It may be the case that not all contents and interactive elements are contained in the PDF as they cannot be presented in this format. Furthermore, automatically generated page breaks may cause coherent contents to be moved slightly. We can therefore only guarantee the completeness of the information in the HTML instructions, and recommend that you use these. You can find these in the download section of the website under www.sennheiser.com/download.

2. Product overview

Information about the scope of delivery, the device's structure and connections, and available accessories.

[Delivery includes](#)

[Top and bottom](#)

[Connectors and controls](#)

[Accessories](#)

Delivery includes

- TeamConnect Ceiling 2 ceiling microphone
- 3-pin Phoenix connector (3.81)
- 8 self-adhesive rubber feet
- 2 eye bolts (M4 x 10)
- Instruction manual
- Manufacturer declaration sheet

Top and bottom

Top

1 Status LEDs (Multi-colored, can be configured with software)

2 Microphone capsules (Twenty-eight KE 10-237)

Bottom

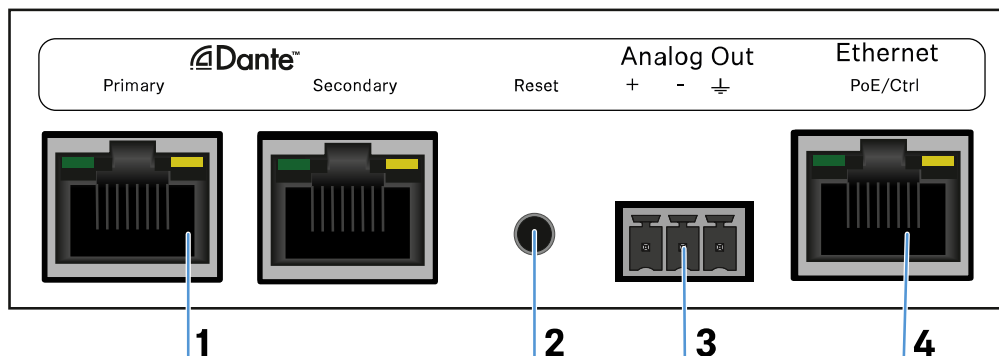

1 Connection sockets (See [Connectors and controls](#))

Connectors and controls

1 Digital audio output

- Dante® interface with two RJ-45 sockets, Primary and Secondary
- Supports redundancy and switched mode
- See [Outputting digital audio signals](#)

2 Reset button

- To reset to factory settings, hold down for 5 seconds

3 Analog audio output

- 3-pin socket
- Suitable for Phoenix Contact MCVW 1.5-3-ST-3.81
- See [Outputting analog audio signals](#)

4 PoE/Ctrl socket

- RJ-45 socket
- PoE supply (Power over Ethernet)
- Configuration via the software or a media control system
- See [Connecting to a network](#)

3. Planning and installation

Information about connecting to a network, audio output and installation planning.

[Connecting to a network](#)

[Outputting analog audio signals](#)

[Outputting digital audio signals](#)

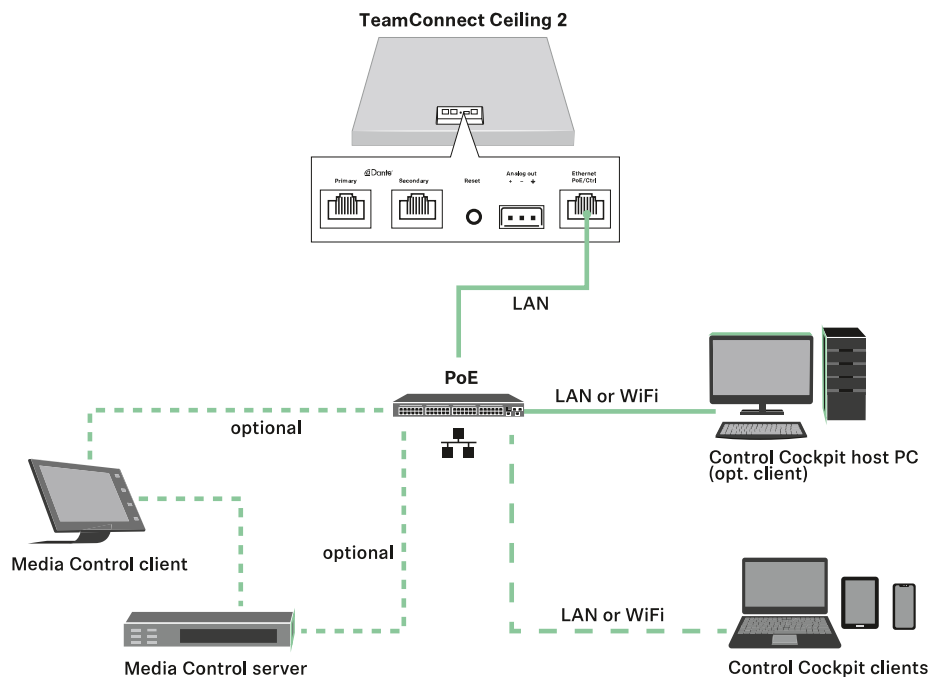

[Planning the installation](#)

Connecting to a network

The Ethernet PoE/Ctrl RJ-45 socket is used to both power the TeamConnect Ceiling 2 via Power over Ethernet and configure it using the Sennheiser Control Cockpit software (see [Configuring the TeamConnect Ceiling 2 with the Sennheiser Control Cockpit](#)).

In your network you can either use a switch that provides PoE or a PoE injector.

- i** Use only shielded STP network cables that do not exceed an AWG value of 24.

Related information

[Connectors and controls](#)

Outputting analog audio signals

Use the Analog Out socket to output analog audio signals.

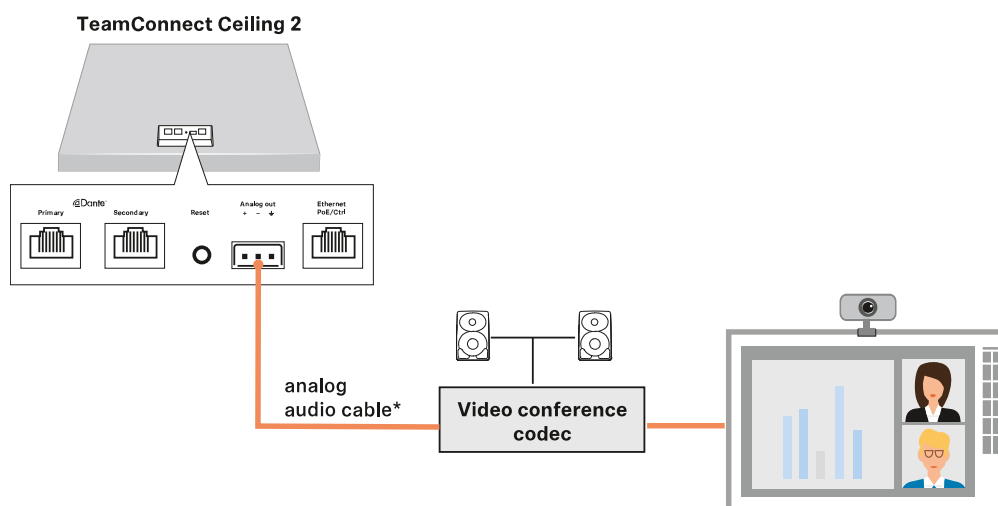

- i** The analog audio cable is not included with delivery. Depending on the audio input of your DSP, the cable must connect 3-pin terminal to 3-pin XLR terminal or to jack.

Variant 1: output analog audio signal to a DSP

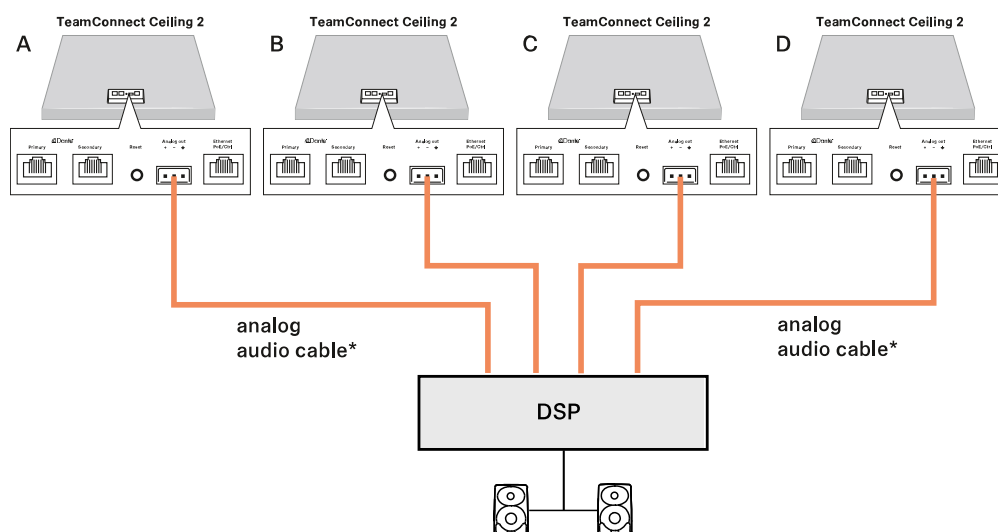

Variant 2: output analog audio signal to video conference codec

Variant 3: output analog audio signal from multiple ceiling microphones to a single DSP

Related information

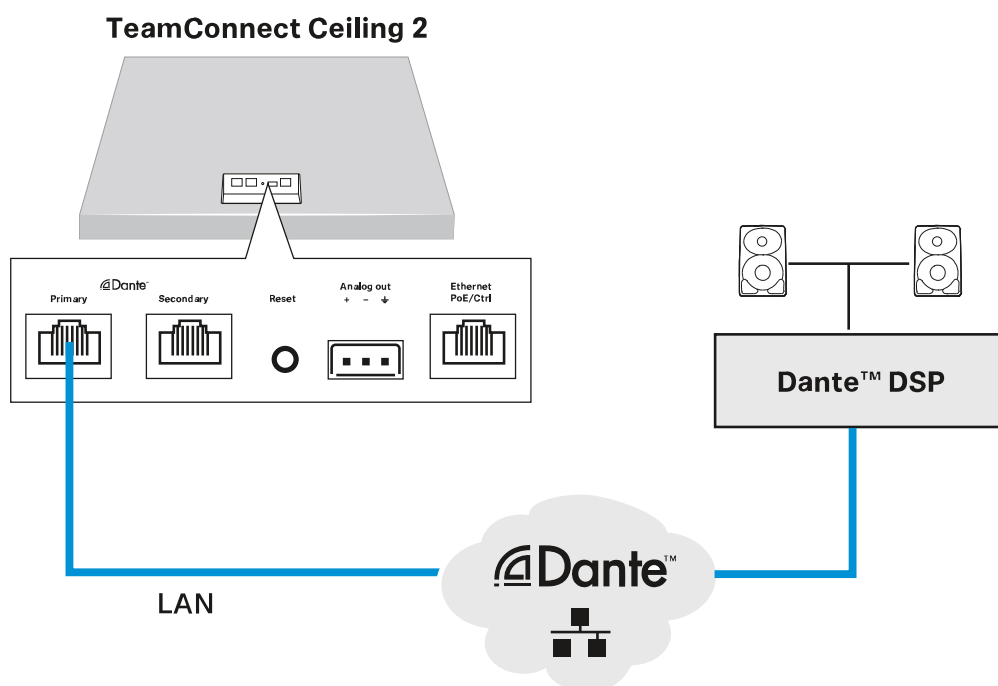

[Connectors and controls](#)

Outputting digital audio signals

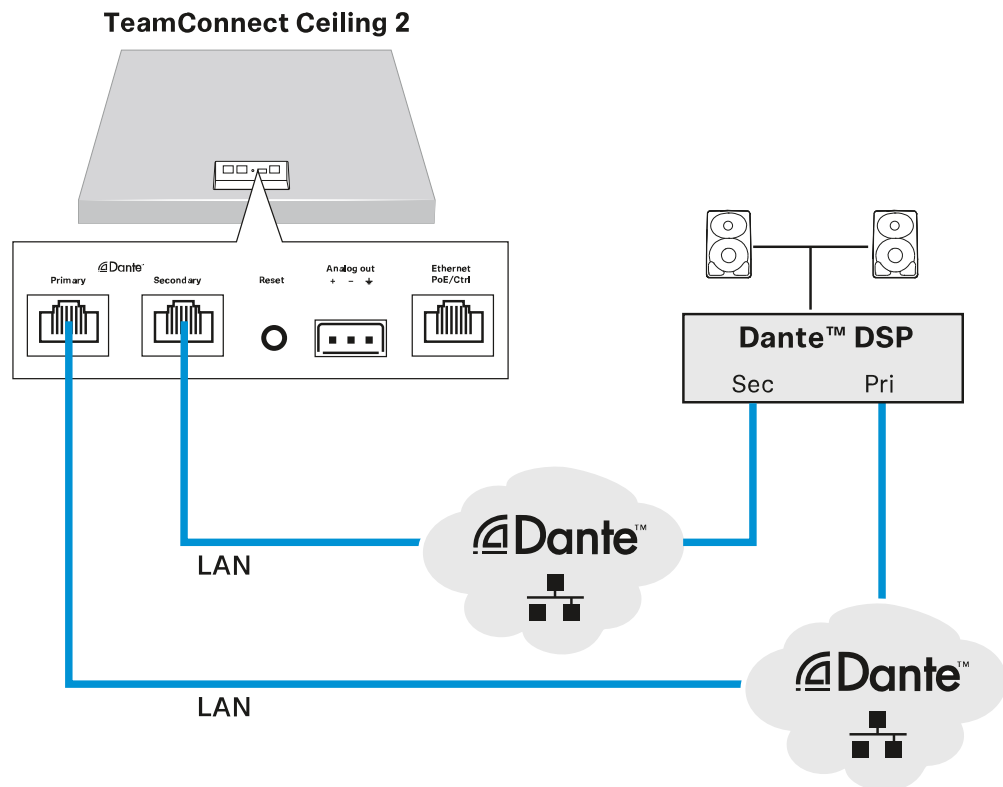

The Dante® interface with two RJ-45 sockets, Primary and Secondary, is used for outputting digital audio signals. The interface supports redundant output and series connection of multiple ceiling microphones (switched mode). The mode is configured using the Dante Domain Manager or Dante Controller from Audinate (audinate.com).

Variant 1: output digital audio signal to one Dante® network

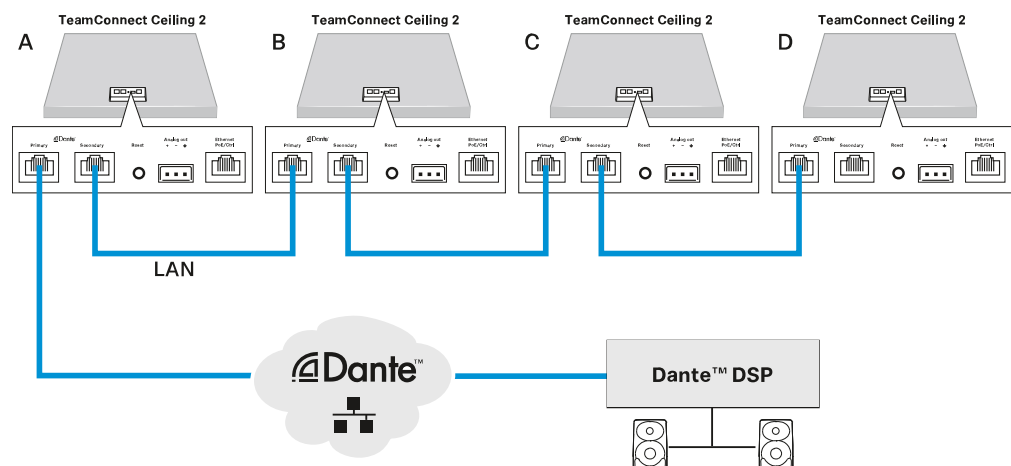

Variant 2: output digital audio signal redundantly to two separate Dante® networks

Variant 3: output digital audio signals from multiple ceiling microphones connected in series to one Dante® network

Related information

Planning the installation

i Detailed installation instructions can be found in the section [Installation and startup](#).

Possible installation variants

Variant 1: installed flush in a dropped/coffered ceiling

Accessories required:

- [Angle brackets](#)
 - SL CM EB US (590 mm to 2 ft) or
 - SL CM EB 625 (590 mm to 625 mm)

Variant 2: mounted directly below the ceiling

Accessories required:

- [Ceiling mounting frame](#)
 - SL CM FB

Variant 3: suspended from the ceiling

Accessories required:

- [Ceiling suspension kit](#)
 - SL CM SK

Adapting the installation height

- i** Observe the following minimum and maximum distances when installing the TeamConnect Ceiling.

The recommended maximum distance from the speaker to the TeamConnect Ceiling 2 is 4 to 5 m.

The minimum distance from the TeamConnect Ceiling 2 to the floor is 2.50 m.

- i** If installation variants 1 or 2 would result in a distance greater than the recommended maximum due to the room height, we recommend installation variant 3.

Recommended distances for variants 1 and 2:

Recommended distances for variant 3:

[Planning the installation](#)

Variant 1: installed flush in a dropped/coffered ceiling

The TeamConnect Ceiling 2 can be easily installed in a dropped ceiling or coffered ceiling with square ceiling tiles (600 x 600 mm). Angle brackets are available for ceiling tiles with the standard dimensions of 2 ft or 625 mm.

When flush mounting, do not install the TeamConnect Ceiling 2 directly next to lights or other electrical devices in the ceiling.

WARNING

Danger of injury and damage to property if the product should fall

If mounted incorrectly, the product may fall.

- ▶ When mounting on the ceiling, always secure the product against falling.

A: secured with SL CM SK suspension kit

B: secured with eye bolts

- ▶ Hand-tighten the M4x10 eye bolts in the TeamConnect Ceiling 2 to avoid damaging the metal housing by screwing them in too deeply.
- ▶ Make sure that the thread on the eye bolt is fully within the thread at the mounting point.

i Recommended cabling

Observe the following when connecting and running the cables:

- Always run the cables carefully and in a loop shape inside the installation recess.
- Make sure not to kink the cables to avoid breaking them or damaging the plugs.

i Recommended paint protection measures

Protect the surface of your TeamConnect Ceiling 2 against scratches or damage to the paint by using the clear rubber feet included with delivery.

- On the underside of the TeamConnect Ceiling 2, clean the areas where you want to attach the feet.
- Attach the feet to the product.

Installing the TeamConnect Ceiling 2 without mounting bracket in the ceiling (600x600 mm grid):

- ▶ Remove a tile from the ceiling.
- ▶ Place the TeamConnect Ceiling 2 in the frame in the coffered ceiling.
- ▶ Maintain the distances indicated in the figure.

Installing the TeamConnect Ceiling 2 with mounting brackets in the ceiling (2x2 ft or 625x625 mm grid):

- ▶ Attach the mounting brackets to the TeamConnect Ceiling 2 as shown in the figure.

- ▶ Remove a tile from the ceiling.
- ▶ Place the TeamConnect Ceiling 2 in the frame in the coffered ceiling.
- ▶ Maintain the distances indicated in the figures.

► Mounting with SL CM EB US:

► Mounting with SL CM EB 625:

✓ The Team Connect Ceiling 2 is now mounted flush with the ceiling.

Related information

[Accessories](#)

Variant 2: directly below the ceiling

To mount the product directly below the ceiling, you need the SL CM FB ceiling mounting frame.

- i** Screws and anchors for mounting the product to the ceiling are not included with delivery. Use screws and anchors that are appropriate for the particular characteristics of your ceiling.

Mounting the ceiling mounting frame

- Screw the ceiling mounting frame to the ceiling using four suitable screws and anchors.

Fastening the mounting brackets to the TeamConnect Ceiling 2

- ▶ As shown in the figure, fasten the four mounting brackets to the TeamConnect Ceiling 2 using two of the included M4x8 screws for each bracket.
- ▶ Screw one M4x12 screw into each of the four angle brackets from the side.
- ▶ Do not screw the screw all the way in (see figure).

Fastening the TeamConnect Ceiling 2 to the ceiling mounting frame

- ▶ As shown in the figure, hook the TeamConnect Ceiling 2 into the grooves in the ceiling mounting frame using the four M4x12 screws installed in the previous step.
- ▶ Tighten the four M4x12 screws so that the TeamConnect Ceiling 2 sits tightly in the ceiling mounting frame.

✓ The TeamConnect Ceiling 2 is now mounted under the ceiling.

Related information

[Accessories](#)

Variant 3: suspended from the ceiling

For suspended mounting, you need the SL CM SK ceiling suspension set.

- i** Screws and anchors for mounting the product to the ceiling are not included with delivery. Use screws and anchors that are appropriate for the particular characteristics of your ceiling.

Preparing the ceiling fastener

- ▶ Unscrew part A of the ceiling fastener from part B.
- ▶ Thread the steel cable C into part B so that the ball on the steel cable is in part B.
- ▶ Repeat these steps for the other three fasteners.

Mounting the ceiling fastener

- ▶ Attach part A of the ceiling fastener to the ceiling using a suitable anchor and screw.
- ▶ Use the included drilling template to align the drill holes.

- ▶ Then screw part B of the ceiling fastener into part A.

- ▶ Repeat these steps for the other three fasteners.

Mounting the product fastener

- ▶ As shown in the figure, screw the product fastener D into the threaded mounting hole on the top of the TeamConnect Ceiling 2.
- ▶ Set the steel cable C to the desired length by using your finger to press the cable guide into the product fastener D and sliding the steel cable as needed.

- ▶ Cut the excess steel cable using suitable pliers.
- ▶ Repeat these steps for the other three fasteners.

✓ The TeamConnect Ceiling 2 is now suspended from the ceiling.

Related information

[Accessories](#)

Mounting the TeamConnect Ceiling 2 on a VESA mount

The TeamConnect Ceiling Medium can be mounted on standard VESA MIS D mounts.

The SL CM VB VESA adapter (available separately) allows you to mount the TeamConnect Ceiling 2 on any 100 x 100 mm or 200 x 200 mm VESA mount.

- ▶ Fasten the ceiling mount to the ceiling using suitable screws and anchors.
- ▶ Observe the mounting specifications from the manufacturer.

Proceed as follows to fasten the SL CM VB VESA adapter plate to the VESA mount:

- ▶ First fasten the SL CM VB VESA adapter plate to the VESA mount.
- ▶ Then mount the TeamConnect Ceiling 2 to the SL CM VB VESA adapter plate as shown in figure 2.

✓ The TeamConnect Ceiling 2 has been mounted on a VESA mount.

Configuring the TeamConnect Ceiling 2 with the Sennheiser Control Cockpit

Downloading Sennheiser Control Cockpit

i To configure and use the TeamConnect Ceiling 2, you need the free Sennheiser Control Cockpit control software. You can download it here: sennheiser.com/control-cockpit-software

i To use the Sennheiser Control Cockpit, you must complete a one-time registration with your e-mail address to receive the software activation code.

- ▶ The Sennheiser Control Cockpit must be used to configure the product for the first time. After that, the TeamConnect Ceiling 2 can also be operated using a media control system. To have access to the full range of functions, however, you should use the Sennheiser Control Cockpit.

There are two ways to operate the TeamConnect Ceiling 2 using the Sennheiser Control Cockpit:

- ▶ Variant 1: integrated in an existing network
- ▶ Variant 2: as a standalone solution with a PC and a PoE-capable network switch

Variant 1: integrating the TeamConnect Ceiling 2 in an existing network

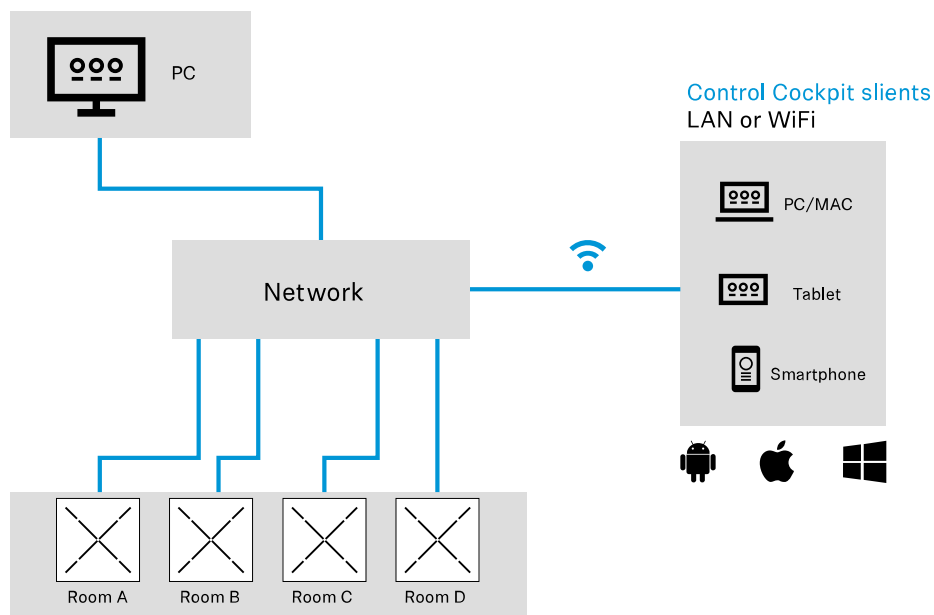

- ▶ The Sennheiser Control Cockpit should be installed on a host PC (Windows 7 or later) that is in the same network as the TeamConnect Ceiling 2 that you want to configure. The Sennheiser Control Cockpit runs on the host PC as a Windows service. Any browser-capable device in the network (e.g. PC/Mac, tablet or smartphone) can

operate the product using the Control Cockpit Client, which is accessed at a specific URL in the browser.

Host PC: Control Cockpit server

LAN

- i** The online help contains detailed information about the functions of the Sennheiser Control Cockpit and how to configure the TeamConnect Ceiling 2 and the network. The online help can be found on the Sennheiser Control Cockpit product page (sennheiser.com/control-cockpit-software) and in the software itself.

- ✓ Team Connect Ceiling 2 has been integrated.

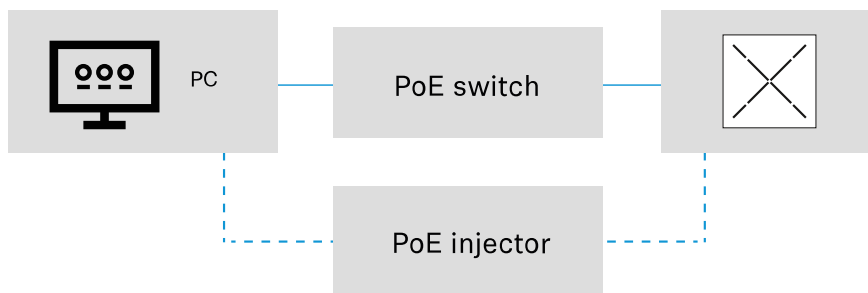

Variant 2: configuring the TeamConnect Ceiling 2 as a standalone solution using a computer

- ▶ Proceed as follows to configure the TeamConnect Ceiling 2 without network integration using a computer: Connect the computer to a PoE-capable network switch using a network cable (Cat5e or higher). Alternatively, you can use a PoE injector.
- ▶ Connect the network switch to the Ethernet PoE/Ctrl socket on the TeamConnect Ceiling 2.

Host PC: Control Cockpit server
and Control Cockpit client
LAN

TeamConnect Ceiling 2

✓ Team Connect Ceiling 2 has been integrated.

✓ TeamConnect Ceiling 2 can now be operated.

Configuring the TeamConnect Ceiling 2 with a media control system

After initial configuration with the Sennheiser Control Cockpit, the TeamConnect Ceiling 2 can also be operated using a media control system.

A media control system allows you to use a custom user interface with the following functions:

- Control the mute function
- Edit audio parameters (adjust output level, show microphone level, set EQ)
- LED control
- Transmit speaker position

Sample application:

i The media control protocol for TeamConnect Ceiling 2 is available for download as a PDF file on the product web page: sennheiser.com/tc-ceiling-2

NOTICE

Liquids can damage the electronics of the product

Liquids entering the product housing can cause a short-circuit and damage the electronics.

- ▶ Keep all liquids away from the products.
- ▶ Do not use any solvents or cleansing agents.
- ▶ Disconnect the mains-operated products from the power supply system and remove rechargeable batteries and batteries (if present) before you begin cleaning.
- ▶ Clean all products only with a soft, dry cloth.
